Weekly Coal Production

Energy Information Administration
Washington, D.C.

Production for Week Ended:
December 29, 1984

Published:
January 7, 1985

Highlights

Production of bituminous coal and lignite in the week ended December 29, 1984, as estimated by the Energy Information Administration, was 10,486,000 short tons. This was a decrease of 3,556,000 short tons or 25.3 percent from production in the previous week. Production in the corresponding week of 1983 was 8,763,000 short tons. Bituminous coal and lignite production from January 1 through December 29, 1984 totaled 884,630,000 short tons, 13.7 percent above production in the same period of 1983.

Production of Pennsylvania anthracite in the week ended December 29, 1984, as estimated by the Energy Information Administration, was 18,000 short tons, 53,000 short tons less than production in the previous week. Production in the corresponding week of 1983 was 54,000 short tons. Anthracite production from January 1 through December 29, 1984 totaled 4,011,000 short tons, 1.9 percent below production in the same period in 1983.

Figure 1. Bituminous Coal and Lignite Production

Bituminous Coal¹ and Lignite Production

Production (Millions of Short Tons)	Week Ended			Year to Date		
	12/29/84	12/22/84	12/31/83	1984	1983	Percent Change
Production (Millions of Short Tons).....	10,486	14,042	8,763	884,630	778,003	13.7
Shipments (Millions of Short Tons)....	65,926	112,573	56,219	5,909,411	5,203,909	

¹Subbituminous coal.

Data for 1984 are preliminary. 1984 production for July - September based on completion of the coal distribution survey (Form EIA-6). Association of American Railroads, Transportation Division, Weekly ; Energy Information Administration, Form EIA-6, "Coal Distribution and Mining Agency Coal Production Reports."
